

ANCILE uLEARN™

TAKING CONTROL OF ALL YOUR LEARNING CONTENT

Whether your organization has one hundred employees or many thousands, you've undoubtedly built up a library of learning content. Managing and distributing this content across various systems can be complicated and frustrating. Ideally, you would like to integrate it seamlessly and consistently across your enterprise. But the challenges and costs seem daunting. You just need a way to catalog, deliver and track all these learning assets and activities.

Those are exactly the kinds of issues that ANCILE uLearn™ can address.

The uLearn learning management system (LMS) puts all your learning content in one place...to create an all-inclusive library...to distribute it throughout your organization...and to target it precisely to those who need it. Amazing as it sounds, your uLearn system can be up and running in just a matter of days. Moreover, with uLearn, the time and resources it takes to deploy and manage all of your learning activities are greatly reduced. It also allows you to efficiently repurpose and redistribute content — whether internally for employees or externally for customers and partners.

KEY FEATURES & BENEFITS

- SCORM Conformant
- Robust Reporting
- Highly Customizable
- Branded for You
- Assessment & Certification Support
- Manages all Learning Activities & Assets

A TOTAL LMS SOLUTION

Whether the content is published automatically from ANCILE uPerform — the content-creation component of the Learning & Performance Platform — or is imported from existing assets, uLearn provides total control of your organization's curriculum and learning initiatives. With uLearn you can:

- Create and manage multiple courseware catalogs
- Manage instructor-led events, online courses, and assessments
- Establish role-based training plans
- Track completions and assessments
- Turn your content into a revenue stream via eCommerce transactions
- Provide the flexibility and scalability to meet any learning requirement — from a handful of employees to tens of thousands

REMARKABLE EASE OF USE, REMARKABLE RESULTS

For every learner — employee, manager, administrator — uLearn provides a smooth and enjoyable experience for all. The interface is intuitive and simple to use. An employee can be working with content and learning within 30 seconds. In a few quick steps, the manager can select a course and enroll her people. Keeping tabs on everyone's progress is just as trouble-free. And for the uLearn administrator, once the catalogs and groups are set up, the process almost goes on autopilot. Deploying, managing and obtaining first-class results from an LMS has never been easier.

EASY-TO-USE AND COST-EFFECTIVE

There are a lot of systems to choose from. If your organization is looking for a solution that is quick to implement, easy to use and manage, highly scalable and adaptable, and extremely cost-effective...Then you should be looking at uLearn.

And whether you require just a little support for your uLearn implementation — or a lot — ANCILE's expert team is there to make sure you get the most from your uLearn.

YOUR CHALLENGE

Lack of Control Over Varied Learning Assets

You may have hundreds of courses and other content managed in different systems and stored at various locations throughout your organization. You've never been able to consistently catalog them in one centralized system...consistently categorize them...consistently deliver them to learners... consistently track results...and consistently deliver reports to the appropriate managers.

End Users Find Learning or Management Functions Slow to Launch

Many LMS's require users to laboriously go through too many steps in order to launch their courses — wasting precious minutes out of busy workdays.

Lack of Responsiveness to Learning Needs

Some learning management systems are large and inflexible. They're simply not capable of providing the focused, customized learning that you need for your department, division or subsidiary.

LMS Vendors Don't Know Your Business

While some learning is generic, much needs to be specific to your business and your industry. The problem is that many vendors have little experience with tailoring a solution to your specific learning programs.

Customizing the Look and Feel of Content is Complicated and Costly

Different subsidiaries, markets, and geographies may need to present their learning "brands" with varying looks and feels. Your current LMS makes it hard to provide that customization.

OUR SOLUTION

ANCILE uLearn catalogs all the different materials that you specify, organizes them according to your needs, and shares them with all designated managers and learners. **ANCILE uLearn** can be up and running within days, delivering content and tracking it — using the criteria you determine with an interface that's easy to use.

ANCILE uLearn has been designed to provide all end users — learners, managers and administrators — with a slimmed-down process for quickly getting on with their learning-related tasks. Employees can access their learning assets within a few mouse clicks.

ANCILE uLearn has the flexibility to handle the requirements of subsidiaries or departments, while providing the features and benefits that a large-scale corporate implementation would provide. Moreover, it can be done very cost-effectively and scaled to your organization.

ANCILE is an organization that has been a leading provider of learning and process-improvement solutions to most of the major business sectors across the globe. **ANCILE uLearn** was created from that very broad experience.

ANCILE uLearn can be tailored to support various parts of your business geographies, subsidiaries and business units to various constituencies that can have the looks and feels that serve them best.
