

Coming Soon in ANCILE uPerform™ 4.4

Our upcoming release focuses on several key areas with the goal of driving additional return from your uPerform investment. Take a look at the specific features coming soon to help you maximize your workforce using uPerform features and output.

Sustain your enterprise software investment:

- Keep content evergreen by easily notifying authors and other subscribers when transactions or screens change in SAP
- Deliver “guided help” to assist users as they execute tasks in a live environment

Go Mobile with your content to learn anytime and anywhere:

- View published output – documents, simulations, and courses – on the iPad
- Access published content on the uPerform end user website on the iPad

Meet Compliance and Accessibility requirements:

- Specify retention periods for website content to comply with ISO and HIPAA mandates and ensure relevancy
- Produce keyboard-accessible simulation and course outputs to meet US Section 508 standards

Extend Collaboration options to drive informal learning results:

- Create discussions connected to a folder or project to provide additional opportunities for author and user exchange

Empower your team with Authoring Enhancements to enhance flexibility and speed delivery:

- Record audio from directly within the uPerform client
- Apply newly-created template sections to existing documents
- Create text-based content directly on the uPerform website to enable microlearning

All of the above, plus the ability to record and work with the Latest Technologies:

- Record SAP NetWeaver Business Client (NWBC), Dynamic Adobe Forms, and most 64-bit Windows and web-based applications
- Browse and view output in Safari 5, Internet Explorer 9, and Firefox 4.0
- Leverage the Oracle 11g database server
- Sync with Active Directory 2010

Delivering Business Value with ANCILE uPerform

Deliver a well-trained and equipped workforce to drive your business

- Capture and Create – Create and edit a document and simulation simultaneously, simply by recording your business applications
- Rapid eLearning Courses – Develop engaging eLearning courses complete with knowledge checks and assessments
- Multi-Format Publishing – Publish all content in a variety of common formats
- Context-Sensitive Help – Link learning content directly to specific screens or tasks within your business applications

Manage and secure content to deliver support across your organization

- Template-Based Authoring – Use templates to ensure authors create consistent content
- Multi-Language Support – Quickly create different language-specific versions of the same task information
- Content Management – Store and manage all your organization's knowledge, business processes, and training materials
- Targeted Delivery – Organize and filter information by job, language, location, or other category
- Enterprise Scalability – Employ single sign-on and virtualization to enable cost-effective support of large, complex application rollouts

Harness your tribal knowledge to ensure ongoing employee performance

- Collaboration – Share insights with other employees and provide helpful feedback to your authors
- Subscriptions and Notifications – Stay informed when information changes and new discussion messages appear
- Managed Workflow – Ensure content is reviewed by the right people before it's delivered to your workforce
- Personalized Home Page – Access your favorite content, discussions, and notifications from a single page
