

Use SAP Productivity Pak (SPP) to extend user adoption for your OpenText Content Server

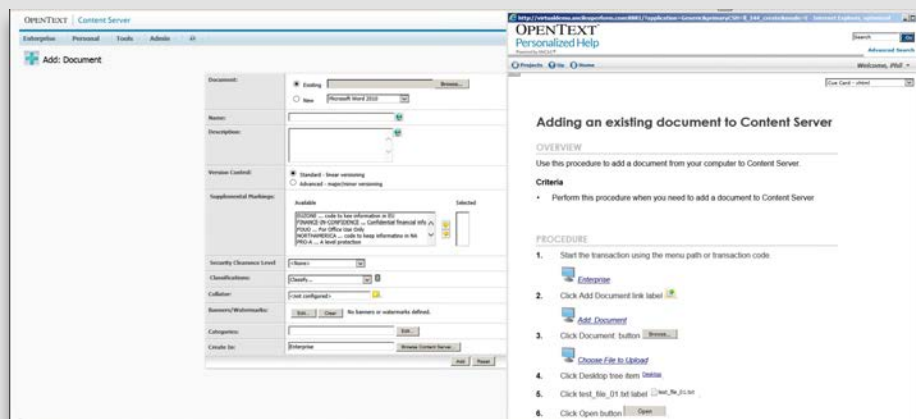

Leverage your investment in SAP Productivity Pak (SPP) by using it to drive user adoption for your enterprise applications, including OpenText Content Server. Just as your SAP users access in-application context-sensitive help within SAP applications, your OpenText users can gain the same context-sensitive help benefit within OpenText applications, including Content Server (ECM).

SAP Productivity Pak (SPP) drives rapid user adoption across your SAP and enterprise application portfolio by allowing organizations to create, manage, and deliver quality learning content to help users achieve proficiency and sustain performance over time. The end result is accelerated software adoption, increased user proficiency, reduced help desk calls, and an increase in the ROI of your SAP and OpenText applications.

SAP Productivity Pak Context-Sensitive Help for SAP

SAP Productivity Pak Context-Sensitive Help for OpenText
