

uPerform® for Healthcare

Optimize your EHR investment, reduce screen-time, and accelerate your healthcare delivery with uPerform.

Empower Clinicians and Boost Proficiency

uPerform by ANCILE Solutions®, part of the Epic® App OrchardSM, empowers clinicians to master EHR and be more productive by providing in-application performance support at the time of need. uPerform helps your users master the EHR:

- Access to up-to-date, role-based learning content without leaving the workflow.
- Find answers quickly from a single location on any device – where, when and how they need it.
- Complete EHR activities more quickly and accurately with support only a click away, leaving staff more time to focus on patients.
- Reinforce instructor-led training and EHR skills continuously.

“If healthcare organizations offered higher-quality educational opportunities for their care providers – and if providers were expected to develop greater mastery of EHR functionality – many of the current EHR challenges would be ameliorated.”

– Longhurst et al. (2019, February). *Local Investment in Training Drives Electronic Health Record User Satisfaction*. *Applied Clinical Informatics*.

Accelerate Content Creation and Change Communication

Faced with quarterly EHR upgrades, it's important for hospitals to create and deliver user-specific learning content rapidly. uPerform empowers your education team and subject matter experts:

- Accelerate content creation by recording once and distributing multiple output types, including simulations, tip sheets, and videos.
- Create customized learning content based on role, specialty, department and activity.
- Master the ever-evolving EHR by quickly rerecording and republishing content when changes are required.
- Consult analytics and reporting to understand content access and usage, content lifecycles, and proficiency gaps.

“The biggest benefit using uPerform is to be able to make and maintain your content across the enterprise and have a proficiency continuum for your employees – you can take a user from a novice to an expert.”

– Senior Training Manager, Healthcare System
